

GULF COMMERCIAL AGENCY

GULF COMMERCIAL AGENCY (GCA)

Has been serving the oil and gas sector in the United Arab Emirates since 1980 by providing one - stop - shop fully integrated oilfield supplies and services.

GCA's name, under the wise patronage of its chairman H.E.Faraj Ali Bin Hamoodah, has now become synonymous with excellent reputation, Integrity, reliability and service, supported by a dynamic and highly experienced management team.

GCA's role is to be bridge the gap between OEMs/distributors and our clients by providing value engineering, life cycle cost evaluation and custom built fit for purpose solutions with after sales support and service provided by highly trained and experienced staff.

GCA's strengths and objectives are:

- Total quality management and high emphasis on HSE.
- Obtain and analyze market information with continuous follow up.
- Adapt to changes and challenges with innovation and creativity.
- Hold and manage massive inventory at no extra cost for our clients.
- Search for gaps in the market and fill them.
- Immediate response to client's requirements.
- Create seamless relationship between **GCA, OEMs/distributions** and our clients.

GCA's has been the agent and distributor for many international pioneer companies such as:

- Samil:

SAMIL INDUSTRY CO LTD are a manufacturer of a complete line of Level gauges, Sight glasses & Flow elements to use in the general industries.

- Valvitalia:

Valvitalia are a major Group operating in the field of the design, production and supply of equipment and components intended for the energy, marine and civil industries at the global level. Their main products are: valves, actuators, fittings, flanges, isolation joints, systems for the measurement, filtration and regulation of fluids and gas and fire fighting systems.

Brands under Valvitalia include ROTOR, DELTA V.E., THEVIGNOT, VANADOUR, VITAS, TORMENE T.G.T., TECNOFORGE, BROADY FLOW CONTROL, SILVANI, EUSEBI and NUOVA GIUNGAS. -

OGS/OGM:

OGS: From the engineering and project management offices in Ely, Cambridgeshire, and fabrication and assembly facility in Swansea, South Wales, we undertake the complete design and supply of skid mounted or packaged equipment. They are accredited by major international operators in the oil, gas and power industries, gas turbine producers and EPC companies. Their scope of supply includes the responsibility for all stages of project execution including initial design, detailed design of process, mechanical, electrical, control and instrumentation, manufacturing, testing, packing and shipping. They also provide a site erection and commissioning service if required.

OGM: Our supply products and turn key systems providing hydrocarbon analysis and flow metering for the Oil & Gas Industry for both liquid and gas streams. OGM offers front-end consultancy, prototyping, in-house testing and accompanies these services with cutting-edge scientific research. Expertise includes Fiscal Metering, Custody Transfer, On-line and Off-line analysis.

- Welspun Corp Ltd:

WCL takes pride in manufacturing and supplying to some of the most critical pipelines in the world.

- NOV (NATIONAL OIL VARCO) :

National Oilwell Varco is an American multinational corporation based in Houston, Texas. It is a leading worldwide provider of equipment and components used in oil and gas drilling and production operations, oilfield services, and supply chain integration services to the upstream oil and gas industry.

NOV RIG TECHNOLOGIES

Rig Technologies comprises three parts: Rig Equipment, Marine and Construction, and Aftermarket Operations. Our Rig Equipment team engineers and manufactures drilling rigs, advanced drilling equipment packages, and the related capital equipment (including top drives, iron roughnecks, drawworks, blowout preventers, mud pumps, risers, pipe handling, and power and control systems) necessary to drill oil and gas wells. Their Marine and Construction group supplies the offshore industry with heavy-lift cranes, mooring machinery, jacking systems, pipelay and cablelay systems, and marine riser tensioners. They fully support the entire life cycle of our equipment through our Aftermarket Operations teams that provide spare parts, repair, and equipment rentals as well as remote equipment monitoring, technical support, field service, and customer training.

CRANES

NOV provides a full range of cranes with spares.

The types of cranes include:

- Lattice Boom Offshore
- Knuckle Box Boom
- Telescopic Box Boom
- King Post Pedestal
- Crane with Active Heavy Compensation

ROTRAY EQUIPMENT:

- TOP DRIVE

NOV is a pioneer in introducing this technology and can provide a full range of Top Drives including hydraulic and portable types.

- ROTRAY TABLE
- SWIVEL

NOV MISSION

They provide comprehensive aftermarket product and service solutions for their rig, marine, and construction equipment, which is located on thousands of drilling rigs and offshore vessels around the world. They offer the broadest range of integrated service and support in the energy industry, and, as the original equipment manufacturer, they use their in-depth product expertise and technical know-how to help keep fleets running safely and efficiently.

NOV COMPLETION AND PRODUCTION SOLUTIONS

NOV Completion & Production Solutions segment provides safe, efficient, innovative solutions to maximize the flow of hydrocarbons and direct discrete production streams everywhere the customers operate.

When the drill bit stops turning, our equipment comes into play. From well construction components like premium connections, liner hangers and cementing equipment to downhole multistage fracturing tools, pumpers, blenders and sand storage solutions, their tools allow operators to optimize the completion of a well.

Once a well is completed, their robust suite of coiled tubing and wireline equipment allow for cost-efficient and reliable intervention work from the truck to the software to the BOP stack. From there, production begins. Whether on land or offshore, their highly-engineered equipment helps lift, pump, flow and separate oil, gas, water and sand streams on the surface or even subsea. Their variety of composite piping and structures helps to connect and carry product in even the most corrosive environments.

Outside of oil and gas, their pumping, mixing, separation and composite pipe technology can be applied in a variety of other industries to process fluids. From their flagship products with 100 years of history to our new technologies engineered to solved the latest oilfield problems, they are here to help the customers achieve lasting success.

CTES SOFTWARE

Through innovation and dedicated specialists, CTES has developed the most trusted coiled tubing monitoring devices, data acquisition systems, and modeling software. We specialize in the following products: • Modeling software (Cerberus™) for intervention, drilling and completions • Data acquisition systems (Orion™) and specialized monitoring sensors • Engineered products for intervention operations

DNOW

DNOW is recognized as the worldwide leader in the provision of maintenance, repair and operations materials, spare parts and global supply chain solutions for the oil and gas industry. Our goal is to provide superior customer value by utilizing DNOW's supply chain management network to reduce your total cost of operations while we provide you with outstanding service and the product you need, when and where you need it.

With over 200 distribution centers worldwide and its massive available inventory, DNOW Services can provide a wide range of equipment, including:

Valves and Actuators

DNOW Distribution represents a wide range of manufactures with API certification and is able to fulfill any and all value requirements.

Fittings and Flanges:

A wide range of fittings and flanges:

- Flanges and related products
- Gaskets and rubber sheets
- Unions
- Swivel joints
- Pipe fittings
- Weld fittings

Mud Systems

Solids control and waste management products:

- Agitators
- Centrifugal pumps and packages (Mission)
- Shale shakers
- Screens, distillers and degassers

Safety Supplies

- Boots
- Breathing apparatus
- Eye Protection
- Gloves and Helmets
- Fall protection

Expendables

A full line of mud pumps expendables:

- Gaskets
- Liner retention systems
- Liners
- Mud lab Equipments
- Pistons
- Modules

Preventive Maintenance and Consumable supplies

- Compound and filter
- Grease and Oils
- Cleaners and Solvents
- Hand Tools
- Fasteners and Rope
- Welding Supplies

Electrical

Full range of specialty products

- Motors
- Cable
- Lighting
- Accessories

LOCATION:

PLOT No.5B, SECTOR MN 5
5TH ROUNDABOUT, CORNICHE ROAD
MUSSAFAH-ABU DHABI
